

35th NERIS Management Board meeting

Tuesday 2nd October 2018

9.00 – 10.30

Minutes

Participants

S. Andronopoulos (NCSR)
T. Duranova (VUJE)
D. Oughton (NMBU)
E. Gallego (UPM)
W. Raskob (KIT)
T. Schneider (CEPN)

Excused

J. Camps (SCK•CEN)
F. Gering (BfS)
O. Isnard (IRSN)
C. Murith (FOPH)

Invited

Catrinel Turcanu (SCK•CEN)

NERIS Secretariat: E. Lafranque (CEPN)

Proposal of SSM to become a Supporting Organisation

T. Schneider informs the Management Board that Anna Maria Bilxt Buhr contacted the NERIS Secretariat to become Supporting Organisation of the NERIS Platform.

1. Review of the list of actions of the 34th Management Board meeting

Proceedings : check the list of papers to see if there are enough papers to publish. Right now we have 15 papers out of 40 presentations.

International : come back after.

NFRP9 : Thierry sent the SERENADE project to the MB. Sisko will take the lead. 10k€ for the participation to different meetings. Main challenge : identify in which way results have been used. Important connection with international and national organisations in charge of emergency recovery. More info : contact Thierry and we'll see the rest with Sisko. It's possible that the project start in June next year

SSH platform: Recommendation: need the support of organisations : set up management structure. Strong recommendation : need the support of the organization. We'll push the organisations to think about that : commitment of the organization with the Letter of Intent.

Next ERPW Stockholm: well in advance what could be the visibility ? Be part of joint session. Take the opportunity to put on table subjects that are at stake for NERIS. Think not to duplicate the work of final workshops of CONFIDENCE/TERRITORIES/ENGAGE. Identify key people from NERIS to be in the

programme committee. Need on what's to be done. Propose two topics : uncertainty/ stakeholder engagement. We can propose Wolfgang and Catrinel.

TS informs that in 2020 Pedro Vaz proposes Portugal but there would be no support from CONCERT since it will be finished. Spring 2020 : CONCERT final meeting. Think when to do the NERIS Workshop.

Catrinel Turcanu : proposition for a summer school at ERPW19. What funding ? EG OK but d'ont duplicate activities with ICRP and . Finland : summer school. See what kind of summer school could be done. TS : make a review + put the idea on the next MB. Need to find financial support, opics, identify strategy. DO proposes to lead, TD could help.

- ⇒ Collect information on Education and Training dealing with Emergency and recovery. What funding ? Have an agreement on the topic.
- ⇒ Have a review on all the existing education and training : what objectives ? what audience ?
- ⇒ Make a review on this situation and put this topic on discussion at the next general assembly
- ⇒ Collect information and analyse existing activities on training on emergency and preparedness (all the management board + supporting organization) to make a presentation for the next General Assembly. Mainly focus on what is dealing with Emergency and recovery

2. Feedback from the meeting in Brussels on mid-term and long-term European challenges in radiation protection research, education and training (25th September)

TS send a short feedback on the meeting : at the invitation of Rita Lejkisoba head of RP research, head of André Jouve. General trend to medical interest, rad waste management and emergency response. Presented the interest of joint programming. André : push to explain what are the main challenges.

Need to embark the science on envt.

Clarify social sciences in NERIS.

Built a message clear enough for EC, member states.

Prepare a strategic signed by the platforms.

Put strategic objectives: explain the key challenges. MB +RD + Supporting Organisations.

Keypoint : cover all the discipline. Be connected with the member state. They decide.

Identify people in member state through the platform.

Next call: preparation of next call is urgent. Need to try to interact with the delegations. Send a message to the supporting organisations : put emphasize on Emergency and Recovery.

Develop a text to send on behalf of NERIS to SO.

3. Feedback from the CRPPH meeting in Milano (17th-18th September)

Not related to NERIS : only Low Dose. Around 35 participants from 13 countries : Europe, US, Japan, Canada etc. Objective : what's the state of LD research. Improve collaboration between organisations. NEA will set up a high level working group on LD and other topics.

March 2019 : CRPPH paper to be discussed

Concern that LD research might vanish because there is not much output. Positive statement at the end.

NERIS has interest but is not too much involved.

There was only LD people from other continents.

Need to push on the future to embark not only LD research but also RP worldwide.

Push again on this topic.

⇒ WR : send the summary when it is available

Result of the meeting : at next CRPPH bureau. TS could suggest to embark other people.

Take a decision before the end of the year.

4. Work to be done with international organisations

CRPPH: Milan workshop : further action ?

Tatiana : WPNEM : sent to Olvido willingness to participate. Difficult for TD to have fundings to participate. TS proposes a specific meeting in Roskilde + HERCA to do a satellite event.

+ update on ICRP TG on 109 : after the meeting in November, TS will send a draft paper on main challenges in RP.

Proposition to have a meeting of 1 day or more in Paris.

IAEA : mélanie is presenting some work on information, participation and communication (paper done with EG). Pascal : report his expert group? TS : contact Miroslav and Elena.

Important for the Commission : results of research are useful.

WHO : no connection with REMPAN

JRC-ISPRA : Organize a meeting

NUGENIA : WR maybe have an involvement in Roskilde => session to involve them further / in relation with CONFIDENCE-TERRITORIES

Send them a proposal

5. Other topics

Not discussed

Date to be discussed
